FITTING INSTRUCTIONS

LEFT HAND SIDE

- Remove the original rubber foot mat by lifting a corner and gently pulling.
- Remove the two bolts that are now accessible as arrowed in picture 1.
- Take the M6 marking tool (item 7) that is in the kit and screw into one of these holes, ensuring the point is at the top, as shown in picture 2. Re-fit the original rubber foot mat and gently apply some pressure to the area around the marking tool. *This should give a small indentation to locate where to punch a hole through the rubber in order to fit the bolt.* Use the same process to mark the other bolt hole position.
- With the rubber mat removed from the scooter, use the 10.5mm Punch Tool (item 8) supplied with the kit along with a hammer/mallet to create two holes where the marking tool has marked the rubber floor mat, as shown in picture 3. *This should be done with a piece of wood underneath the rubber and on a hard surface.*
- These holes allow the top of the spacers to fit through the rubber foot mat as shown in picture 4.
- Take the left side mounting plate (item 1) and fit the slider (item 4) using three of the M5 countersunk bolts (item 5). Fit the bolts through the slider and screw into the mounting plate and tighten.
- On the scooter, position two of the stepped spacers (item 3) into the bolt recesses (with the smaller diameter facing upwards).
- Re-fit the original foot plate rubber mat, ensuring that the tops of the two spacers fit through the holes that have just been punched in the rubber.
- Offer the R&G footboard slider assembly into position and secure using the two M6 x 35mm countersunk bolts (item 2).
- Place the reflective bubble stickers into recesses to cover the bolt heads.

Repeat the above for the right hand side

Instructions de montage (Coté gauche)

- Enlever la plaque en caoutchouc du repose pied d'origine en soulevant un coin et en tirant doucement.
- Enlevez les 2 boulons qui à présent sont accessible (Photo 1).
- Prendre l'outil de marquage M6 (Article 7) qui est dans le kit puis visser dans un des trous, en vous Assurant que le point est en haut (Photo 2). Remontez la plaque d'origine en caoutchouc du marche pied et émettre une petite pression sur l'espace entourant l'outil de marquage. *Cela va créer un léger renforcement afin de localiser l'endroit où faire un trou à travers le caoutchouc pour passer le boulon.* Répéter le même process pour localiser l'autre trou.
- Avec le caoutchouc retiré du scooter, utilisez l'outil de perforation 10,5 mm (article 8) fourni avec le kit et un marteau / maillet pour créer deux trous où il y a une marque, comme le montre la photo 3. Il est bien de faire cela avec un morceau de bois sous le caoutchouc et sur une surface rigide.
- Ces trous permettront par la suite aux entretoises de passer à travers pour que le boulon soit resserré (Photo 4).
- Prendre le support de montage coté gauche (Article 1) et installer le slider (Article 4) en utilisant 3 des boulons M5 à tête fraisée (Article 9). Passer les boulons à travers le slider et visser dans le support de plaque puis bloquer.
- Positionner 2 des entretoises crantées de 19mm de long sur le scooter (Article 3) sur le creux du trou de boulon avant et l'entretoise.
- Remettre le caoutchouc d'origine du repose pied, en vous Assurant que le dessus des 2 entretoises aillent à travers les trous qui viennent juste d'être faits dans le caoutchouc.
- Mettre le repose pied R&G coulissant en position et insérer les boulons à tête fraisée M6 x 35mm de long (article 2) dans les deux entretoises, prenant en sandwich le caoutchouc, avant de serrer uniformément.
- Couvrez ensuite les têtes de boulons avec les stickers R&G réfléchissants

Pour le côté droit, répéter la procédure.

CONSUMER NOTICE

The catalogue description and any exhibition of samples are only broad indications of the Products and R&G may make design changes which do not diminish their performance or visual appeal and supplying them in such state shall conform to the order. The Buyer acknowledges no representation or warranty (other than as to title) has been given or will apply to the Products other than those in R&G's order or confirmation and the Buyer confirms it has chosen the Products as being of merchantable quality and suitable for its particular purposes. Where R&G fits the Products or undertakes other services it shall exercise reasonable skill and care and rectify any fault free of charge unless the workmanship has been disturbed. The Buyer is responsible for ensuring that the warranty on the motorcycle is not affected by the fitting of the Products. On return of any defective Products R&G shall at its option either supply a replacement or refund the purchase money but shall not be liable if the Products have been modified or used or maintained otherwise than in accordance with R&G's or manufacturer's instructions and good engineering practice or if the defect arises from accident or neglect. Other than identified above and subject to R&G not limiting its liability for causing death and personal injury, it shall not be liable for indirect or consequential loss and otherwise its liability shall be limited to the amounts paid by the Buyer for the Products or the fitting or service concerned. These terms do not affect the Buyer's statutory rights.

R&G RACING RETURNS POLICY (NON-FAULTY GOODS)

Returns must be pre-authorised (if not pre-authorised the return will be rejected). Goods may only be returned direct to us if they were purchased direct from us (customer must prove if necessary). Otherwise to be returned to original vendor. Goods must be in re-sellable condition, in the opinion of R&G Racing. All returns are subject to a 25% restocking and handling fee (25% of the gross value exc. P&P – at the prevailing price at time of purchase). The customer must pay any and all carriage charges. No returns of discontinued products, unless within 14 days of purchase. This policy does not affect your statutory rights and does not refer to faulty goods.
