FITTING INSTRUCTIONS

- Fit the larger location spacer (S0890) into recess in right hand side of front spindle.
- Fit one nut and washer on spindle-bar (SB031) (the end with shorter thread), engage the nut so the plastic insert of nut is fully engaged.
- Feed spindle-bar with nut and washer through either crash protector and through spindle spacer (from the right hand side) just fitted.
- Place remaining solid location spacer (S0889) with smaller spigot over exposed left hand end of spindle-bar so the smaller spigot locates in left hand side of spindle.
- Place the remaining crash protector over the exposed end of the spindle bar.
- Fit washer and nut from kit onto thread and tighten until both nuts are engaged in nylon and equal amounts protrude from either side (please ensure the logo is located at the top of the crash protector). Do not overtighten – the nyloc nuts will hold it tight.
