FITTING GUIDE

Disassembly Instructions:

- Remove the 2 black bolts circled in **Picture 1** and keep them for re-use later.
- Remove the Phillips screw circled in **Picture 2**, this will allow you to remove the black plastic wiring cover. You can now disconnect the three connectors shown in **Picture 4**.
- Now remove the 2 bolts circled in **Picture 3** while supporting the tail unit assembly to prevent it falling.
- Remove the indicators from the OEM tail unit. There is one bolt per indicator that needs to be removed, keep these for re-use.

Assembly Instructions:

- Attach the indicator bracket (**Item 2**) to the main bracket (**Item 1**) using 2x of the M5 bolts, 4x M5 washers and 2x M5 nuts (**Items 9, 10 & 11**) as shown in the **Assembly Diagram**.
- Using the supplied 100mm heat shrink (**Item 13**), cover the indicator wires and secure them to the indicator bracket using the original bolts, 2x M5 washers & 2x M5 nuts (**Items 10 & 11**). Fit the wires in the small cutouts on each side of the indicator bracket.
- Then fit the license plate light (**Item 4**) to the main bracket (**Item 1**) and attach the license plate illuminator connector (**Item 5**) to the illuminator wires. **Please use the supplied spacers & bolts to ensure the light clears any plate frame installed and fully illuminates the number plate.**
- Using the 200mm heat shrink (**Item 12**) cover the wires and thread them through

the hole in the main bracket, securing the wire to the underside using the small cutouts and supplied cable ties (**Item 14**).

Fitting Instructions:

- Fit the license plate connector and indicators to the OEM wiring harness.
- Test the indicators and license plate illuminator to ensure they are working correctly, if not the connectors may need to be swapped around.
- While pushing the wiring through the undertray into the bike, hold the tail tidy assembly in place and using the 2x M6 bolts, 2x M6 washers and 3mm spacers (**Items 6, 7 and 3**), attach the front of the tail tidy assembly to the underside of the tail unit as shown in the assembly diagram.
- Using the OEM bolts removed earlier, remaining M6 washers and 2x M6 nuts (**Items 7 & 8**), attach the rear of the tail tidy assembly to the tail unit through the original mounting holes (circled in **Picture 1**).
- Fully tighten the bolts to their required torque.

IMPORTANT: FOR SAFETY, ENSURE THE LICENCE PLATE IS PLACED AS HIGH AS POSSIBLE ON THE TAIL TIDY (IT MAY REQUIRE DRILLING). IF FITTING A LICENCE PLATE OF 200MM OR LONGER (INCLUDING ANY SHROUD OR REFLECTOR ATTACHMENT) TO THE BRACKET, BEFORE RIDING, FULLY COMPRESS THE SUSPENSION TO ENSURE NO PART OF THE ASSEMBLY CAN CONTACT THE TYRE WHILE THE VEHICLE IS IN MOTION OR UNDER LOAD. IT IS YOUR RESPONSIBILITY TO CHECK FOR THIS POSSIBILITY AND TAKE AVOIDING ACTION. FAILURE TO CHECK THIS COULD RESULT IN SERIOUS INJURY OR DAMAGE TO THE MOTORCYCLE.
